Executive skills are critical to the acquisition of academic skills, but, more importantly, they are the skills students need to get things done. They are brain-based skills such as task initiation, sustained attention, working memory, planning, organization, and goal-directed persistence that are absolutely critical to school success. Some students seem to acquire them naturally, but many students struggle with them. Dr. Peg Dawson, co-author of the books *Smart but Scattered* and *Smart but Scattered Teens*, will describe how these skills develop throughout childhood and suggest strategies parents can use to help children acquire the critical skills they need to be successful students.
